

Pervasive Usability

Legal Requirements and
Implications of Section 508

The Policy of Accessibility

Presentation Goals

- Context: Pervasive nature of disability
- Knowledge: Systems to address challenges
 - Legislation
 - ADA, Telecommunications Act
 - Section 508 [electronic and information technology]
 - Solutions
 - Past [ad hoc]
 - Present [compliance driven]
 - Future [designed for usability]
 - Research / Reference (technical, other...)

Context

- Information:

Context

- Information:

**Must make sense to
the intended audience**

Audiences and Environments

- The Built Environment
 - Hospitals
 - Public buildings
 - Private homes
- The Information Environment {broadcast vs. 1-to-1}
 - Oral traditions
 - Print traditions
 - Electronic information

Original design | Clever fix?

Context: hotel (Hyatt)

Accessibility

ADA Devices

The staff at Hyatt Regency Atlanta is committed to ensuring that we meet and exceed all of the requirements for the Americans with Disabilities Act. Our staff is trained to accommodate guests with special needs, so that all of our guests, including those with disabilities, are able to have an enjoyable and safe stay. At Hyatt Regency Atlanta we want to make sure all our guests are able to take advantage of every activity the hotel has to offer.

The following facilities are available for persons with disabilities:

- Audio-visual smoke detectors
- Braille symbols in elevators
- Restaurant and room service menus in Braille
- Wheelchair-accessible doors
- Wheelchair-accessible peepholes
- Wheelchair-accessible climate controls
- The Fitness Center is wheelchair accessible
- Public rest rooms are wheelchair accessible with the exception of Polaris
- Portable bathtub benches are available for all room types
- Portable bathtub grab rails are available for all room types
- Wheelchair-accessible sink/vanity and towel racks
- Wheelchair-accessible closet poles
- Roll-in showers
- Close-captioned television decoders
- Telecommunications device for the deaf (TDD)
- Telephone alerting device
- Front door alerting device
- Vibrating alarm clock
- Portable audio-visual smoke detector
- Amplifying telephone handset
- Lamp signals
- Raised commode seats

In addition, the hotel's front entrance, front desk and concierge desk are all wheelchair accessible.

Access: conference proceedings

Awareness Techniques

- Spend the day in a wheel chair
- Turn off images and CSS in browser
- Talk with PwDs
- Think about advantages of curb-cuts
- ... electronic curb-cuts
- ...read a syntax-check report of HTML errors

Intersection: Awareness & Law

As we move to self-service economy,
what happens to PwD?

- Gas station
- Update Personnel data in Database
- Financial transactions
 - Use of eCommerce [Amazon, Web Van]
 - ATM Machine

Built / Info. Environments

- Bank of America has equipped its ATM machines for speech (headphone) output.

The screenshot shows the Bank of America ATM & Banking Center Locator website. At the top, there is a navigation bar with links for "Find It", "Help", "Contact Us", and "Sign In". Below this is the Bank of America logo. The main heading is "ATM & Banking Center Locator" in red. Underneath, there are three buttons: "Overview", "ATM Locator", and "Banking Center Locator". To the left, there is a section titled "Talking ATMs are coming!" with a text box stating: "More than 2,500 talking ATMs will soon be available to Florida and California users who are blind or visually impaired. Each ATM will be equipped with audio jacks, and will provide secure and audible screen instructions. These machines will make it easier to withdraw cash, deposit money and perform other transactions." To the right, there is a section titled "Easy access banking." with text: "Select the locator buttons above to find the **Bank of America ATM** or **banking center** nearest you. Local maps will point you to the exact location." Below this, it says: "You can also find a **Visa®/Plus® ATM** if you're not near a Bank of America ATM." At the bottom, there is a blue banner with the text: "Re-evaluating your investment plan? Banc of America Investment Services, Inc. can help." Below the banner, there is a disclaimer: "Investment products provided by Banc of America Investment Services, Inc.™" and a table with three columns: "• Are Not FDIC Insured", "• May Lose Value", and "• Are Not Bank Guaranteed". At the very bottom, it says: "Banc of America Investment Services, Inc. is a non-bank subsidiary of Bank of America, N.A., a registered broker dealer and a member NASD and SIPC."

Overview ATM Locator Banking Center Locator

Talking ATMs are coming!

More than 2,500 talking ATMs will soon be available to Florida and California users who are blind or visually impaired. Each ATM will be equipped with audio jacks, and will provide secure and audible screen instructions. These machines will make it easier to withdraw cash, deposit money and perform other transactions.

Easy access banking.

Select the locator buttons above to find the **Bank of America ATM** or **banking center** nearest you. Local maps will point you to the exact location.

You can also find a **Visa®/Plus® ATM** if you're not near a Bank of America ATM.

Re-evaluating your investment plan?
Banc of America Investment Services, Inc.
can help.

Investment products provided by Banc of America Investment Services, Inc.™

• Are Not FDIC Insured	• May Lose Value	• Are Not Bank Guaranteed
------------------------	------------------	---------------------------

Banc of America Investment Services, Inc. is a non-bank subsidiary of Bank of America, N.A., a registered broker dealer and a member NASD and SIPC.

Built / Info. Environments

- **Bank of America Works for Financial Independence for People with Disabilities**
- "Financial independence isn't always about money," says Annette Kellermann of Bank of America. "Sometimes it's about access."
- Talking ATM allows Bank of America to easily access funds. With that in mind, three years ago Bank of America integrated its various efforts for customers with disabilities into one program. The Bank of America Accessible Banking™ program, envisioned as a holistic approach to providing service to people with disabilities, focuses the bank's efforts as never before.

Three Accessibility Laws

What, Why, How, and Exceptions
Specifications vs. Performance Standard

- ADA [1990]
 - “Reasonable Accommodation”
- Telecommunications Act [1998]
 - “Readily Achievable”
- Section 508 [2001]
 - Unless “Undue Burden”

Legislator's notes

- Membership
 - Addition of Private Industry Representation
 - Non-addition of Government Personnel
- Peanut Gallery
 - NIST
 - GSA
 - DoJ

Section 508 – simple text

- Two files contain law
 - Primary Law
 - <http://section508.gov/index.cfm?FuseAction=Content&ID=12>
 - Final Rule
 - <http://www.access-board.gov/sec508/508standards.htm>

Application Process

- Enforcement by Purchase process

...when Federal agencies develop, **procure**, maintain, or use electronic and information technology, Federal employees with disabilities have access to and use of information and data that is comparable to the access and use [by able bodied people]...

Hierarchy of Law

- Includes 6 classes of technology
 - Software applications and operating systems.
 - Web-based intranet and internet information and applications.
 - Telecommunications products.
 - Video and multimedia products.
 - Self contained, closed products.
 - Desktop and portable computers.
- 7th Provision is
 - Functional performance criteria.

Agency Policies

- Accessibility as core component of agency enterprise architecture
 - Full life cycle
 - Purchase
 - Development
 - Complex
- Content providers
 - Audiences [internal | external]
 - Tools and Techniques

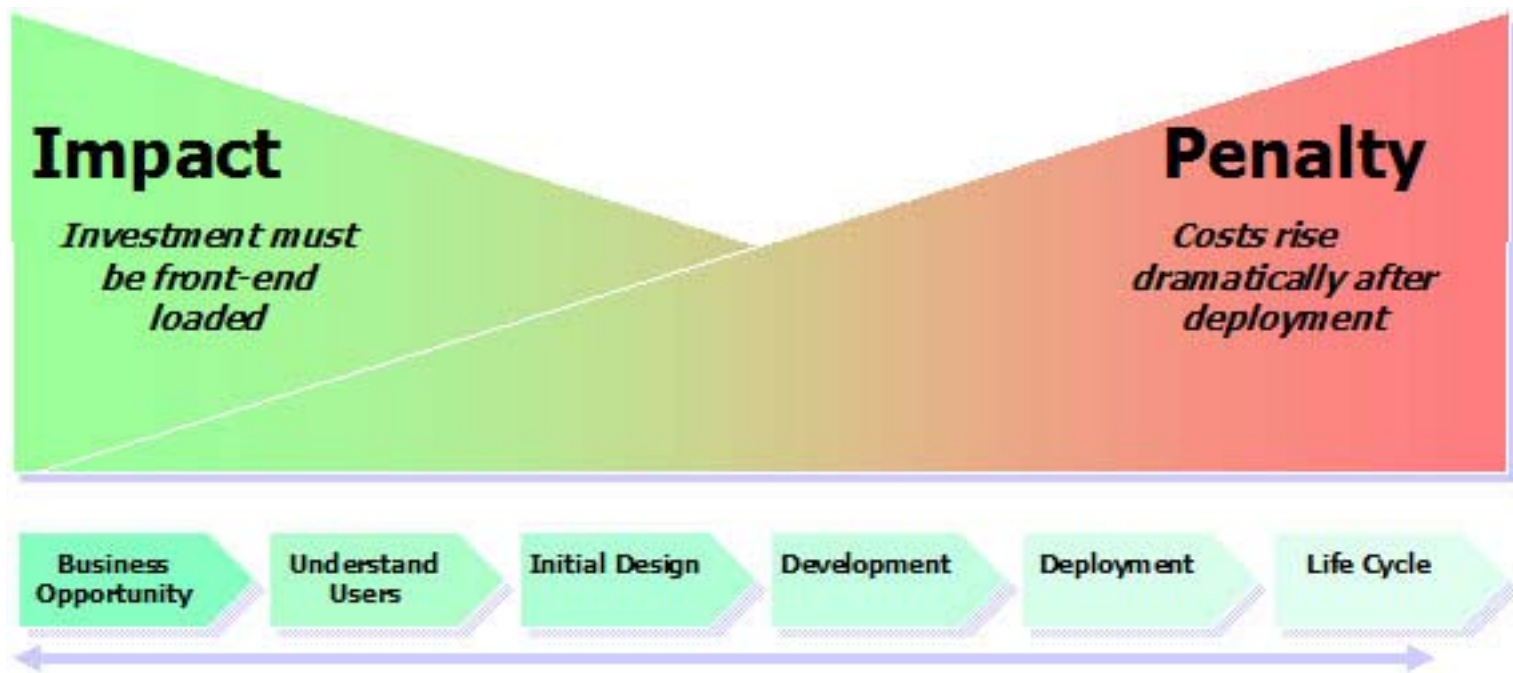

Authoring Guidelines

Purchase vs. Use

- Tools
 - Structure
 - Navigation schemes, Tables, Images, Columns
 - Graphic visualizations
 - Multimedia – (Think “Education”)
- Multimodal – HTML / PDF / Word / Excel / PDA
- Authoring for PwD
 - Tone / Voice / Sensitivity

Life Cycle Impact

Life Cycle - Start

- “Begin with the end in mind...”
 - Persona of PwD
 - Scenarios of Use by PwD

Life Cycle - Implement

- “Useable vs. Useful...”
 - Syntax compliance [compile]
 - Semantic coherence [use and observe]

Personas

Personas are used in industry to help focus on user needs in the product development process by bringing statistical and other user data to life. Personas are endowed with backgrounds and personalities, as well as functional characteristics that represent the diversity of customers and potential customers.

- How Does One Create a Set of User Profiles & Scenarios?
 - Is there a Standard Set of Profiles for Disability Folks?
 - Do People with Disabilities Require Unique Use Cases?
 - How Do You Evaluate Success?

Personas

- Microsoft
 - Hip Hop Folk (mostly young)
 - <http://advertising.msn.com/home/MSNPersonas.asp>
- Georgia Tech - Rehabilitation Engineering Research Center on Mobile Wireless Technology for People with Disabilities
 - An effort for a new perspective
 - <http://www.wirelessrerc.gatech.edu/projects/research/personas.html>

The personas of cell **phone users with disabilities** presented here offer a glimpse into the lives behind the data, exploring the reasons why cell phones are as widely used among persons with disabilities as among the general population, despite the cost.

msn personas

We try to understand an audience through numbers, charts and graphs, but often times we lose sight of the people who represent these statistics. The MSN audience is comprised of a broad range of users at different stages in their life, who use MSN in their own unique way. To help better define the people behind the numbers, MSN has created personas for some key audience segments.

Based on a custom study done by Neilson/Netratings and Comscore, MSN has compiled information about the following groups of people to show a day in each of their lives. We have provided some top line information on each persona here, but for more information, please contact your MSN Sales Representative.

Meet Tyler

Age 8-13, Tyler is best known as a "tween". He has grown up with the Internet and is just beginning to experiment. [Click here](#) to see when Tyler is online and what he is doing.

Meet Amanda

Age 14-17, Amanda is at the pivotal point in her life where she is beginning to define her brand affinities. She is savvy and sees the Internet as an advanced communications medium for her and her friends. [Click here](#) to see when Amanda is online and what she is doing.

Meet Michael

Age 18-35, Michael is the single, young techie. He represents the last of the historical power users of the Internet, but is still one of the leaders in adopting new technology. [Click here](#) to see what Michael is doing online.

Meet Jessica

Age 18-34, Jessica is the single professional who is already learning about the work/life balance and how the Internet can help. She voraciously consumes content on the Internet - [click here](#) to learn what she is doing online.

Meet Marie

Age 33-44, Marie is a married mom trying to juggle the demands of her family, along with handling her part time business. She uses the Internet to get it all done, quickly and easily. [Take a look](#) at when Marie is online and what she is doing.

Meet Carlos

Age 35-49, Carlos is married without any children and spends his time online for both business and personal use. Checking financials, sports scores, and entertainment are just a few of the places he goes. [Click here](#) to see when Carlos is going online and what he is doing.

Cell Phone User Personas :: Danae

Danae is African-American, born in 1975 – “The year Tiger Woods was born – which explains why I love golf”, she says. Danae is a native of the Maryland suburbs near Washington, DC. She has one brother, and her parents live in southern Maryland. Danae has a fiancée, who lives in DC. She works in the Human Resources department of a large telecom corporation.

Danae has a significant sensorineural hearing loss, that began in her early twenties as a result of nerve damage. She can only feel vibrations and hear very loud noises without her bilateral hearing aids – she’s now on her 3rd pair. Having finally located a cell phone that is compatible with her hearing aids (without the use of a

Software: ISO 9241-171

- **Status:**

- Scheduled for publication in 2006 as joint ISO and CEN standard

- **Current structure & content:**

- **1. Scope...**of the standard
- **2. Normative references** (other standards)
- **3. Terms and definitions**
- **4. Benefits of implementing accessibility**
- **5. Principles of accessible design....**8 principles
- **6. Variations in user characteristics**

Software: ISO 9241-171 (2)

- **Current structure & content:**

- **7. How to use this standard...**
 - Two Impact categories
 - Primary = Requirements
 - Secondary = Recommendations
 - Two Implementation responsibilities
 - Operating system
 - Application
- **8. “Ghost clause”! ...**
- **9. General guidelines...currently 24 guidelines**
- **10. Assistive technologies....currently 9 guidelines for the enablement of assistive technologies**

Software: ISO 9241-171 (3)

- **Current structure & content:**

- **11. Input guidelines**...physical (keyboard, pointing devices, audio, tactile, visual) and logical (controls, customisation, saving user preferences)...currently 44 guidelines
- **12. Output guidelines**...physical (data representation, visual, windows, text, colour, animations, audio, tactile) and logical (error notification, online documentation)...currently 89 guidelines.
- **13. Interaction guidelines**....menus, command languages, form filling, Q&A, natural language...currently 7 guidelines
- **14. Multimodal interface guidelines**...currently 7 guidelines
- **Annex A...Issues regarding activity limitations**
- **Annex B...Principles of Universal Design**
- **Bibliography**

Long-term Goal

Begin with the end in mind:

- Integration of all aspects of accessibility into the creation, development, and dissemination of information.
 - Just as the control and prevention of disease is complex, full accessibility is complex.
 - Accessibility will continue to inform usability.
